RESIST REMOVER RR41

Description

- Resist Remover RR41 is a stripping solution designed to remove photoresist from the surface of a substrate.

Properties

◆ Principal solvent	dimethyl sulfoxide
◆ Melting temperature (°C)	18
◆ Appearance	clear liquid
◆ Specific gravity at 25°C (g/cm ³)	1.00-1.05
◆ Guaranteed shelf life at 25°C storage (years)	3

Processing

- Pour the solution into a resist stripping tank.
- Heat the solution to 100°C under an exhaust hood.
- Place the resist coated substrate in the solution for 5 minutes.
- Rinse the substrate with deionized water until the water resistivity reaches the prescribed limit.
